CashView

Your Innovative Casino Cash Management Solution

CashView is a web-based cash management solution that provides an integrated framework for casino cage and vault operations.

CashView automates cashier transfer slips, cage checkout sheets and cash requests for the vault.

Key benefits include reducing manual effort, eliminating spreadsheets and reducing accounting audit hours. By optimizing cash levels via more accurate forecasting, CashView eliminates excess cash, outages and errors.

Highly visual reports provide information at a glance.

Why Cash Management?

Streamlining operations is at the forefront of any successful business. Casino cash management is critical and represents significant resources. CashView offers insight and automation by pulling data on a daily basis from BPS Connect Casino and other sources. It is fully integrated with our efficient banknote processing equipment.

Precise algorithms and inventory management techniques are used to forecast orders and deposits for competing cash needs for armored car deliveries, customer and location demand, historical trends and unique denomination blends.
