

Branch Express

Optimize Commercial Deposits and Change Orders at the Branch

Branch Express

Drive your in-branch commercial deposits and change orders to the fast lane.

Faster Commercial Deposits

Businesses rely on your branch to quickly deposit cash and checks. Our solution makes it easy.

Here's how it works:

1. Customers login to create a deposit.
2. The branch is pre-notified of the deposit.
3. Upon arrival at the branch, the deposit is verified using a currency discriminator and check scanner.
4. The deposit is credited to the merchant's bank account.

Branch Express can create a barcode or a pre-barcode deposit bag can be used. The barcode would be scanned and the deposit information would pre-populated at the teller line for greater efficiency.

Merchant Benefits

- Faster deposits and withdrawals at the branch
- Fewer trips to the branch
- Centralized visibility of deposits
- Fewer reconciliation issues
- Fewer inquiry calls
- Option for provisional credit
- Ensures order can be filled, eliminates wasted trips

Branch Benefits

- Less branch disruption
- Better billing accuracy
- Eliminates lost revenue

Branch Express offers a simple process to automate business deposits at the branch.

Streamlined Change Orders

Branch Express makes it easy for retailers to request cash and coins.

1. Customers login and submit their orders online.
2. The request is routed to the branch, giving back-office staff the time to fulfill the order during off-peak periods.
3. When the customer arrives at the branch, change orders are waiting.
4. The request is recorded in Branch Express.

Branch Benefits

- Faster customer transactions, call ahead optimizes staff time
- Less operational disruption
- Labor optimization
- Fewer customer inquiries and reconciliation questions

Branch Express includes an effective way to pre-notify the branch of incoming change orders.

Make ordering **cash**
as easy as ordering
coffee!
