NotaTracc®
Standardized logistics throughout the cash cycle
Setting new benchmarks through standardization

Cash centers are now able to exploit the potential of high-speed processing systems even more effectively than ever before. Thanks to universal standardization, the transportation and storage of banknotes has become significantly more secure and efficient.

Working in close collaboration with customers, Giesecke+Devrient Currency Technology has developed a unique solution: NotaTracc, an innovative system that enables the secure transportation of banknotes and automated loading when combined with the BPS® M3, M5, and M7 systems.

The core of the NotaTracc system is the standardized NotaTracc tray, which ensures loose banknotes can be securely transported and stored. The NotaTracc tray can be used for intralogistics within cash centers, as well as for transactions between partners in the cash cycle.

The second component is the NotaTracc loading module. Using robotics, this automatically loads notes into the BPS M systems, providing a buffer capacity of up to 24,000 banknotes. This ensures that the system works continuously; the router of the same operator; and exchanges between partners in the cash cycle.

Overall, the NotaTracc system opens up brand new avenues for intelligent automated processing, both in cash centers and throughout the entire cash cycle.

Greater Security
Opportunities to access banknotes during processing are considerably reduced, even going so far as to provide a fully automated, entirely hands-off operational sequence.

Greater Efficiency
Employees no longer need to constantly supervise the processing system and are able to operate two BPS systems at the same time.

Greater Productivity
Maximum throughput without interruptions: together with the BPS M systems and the NotaPack packaging solution, NotaTracc constitutes a core component of G+D’s high-speed world.

Greater User-Friendliness
Thanks to particularly ergonomic and simple handling, users are exposed to less noise and dust.

Greater Future Viability
NotaTracc is our solution to make operational sequences more secure and efficient on three different levels: intralogistics within cash centers; transportation between different cash centers of the same operator; and exchanges between partners in the cash cycle.

Advantages at every level

Secure transport of banknotes between partners (NotaTracc tray)
Smooth, efficient, and secure intralogistics solution (NotaTracc tray and peripherals)
Greater efficiency through automated processing (NotaTracc loading module, NotaTracc tray)
Ergonomic handling

A partnership you can rely on
With responsible consultancy and professional service solutions, G+D Currency Technology ensures that you will benefit from consistently optimized performance of the NotaTracc modules – from commissioning to flawless operation, over the course of many years.

G+D consulting services: perfectly tailored solutions
Our experts analyze individual needs, existing processes, special requirements, and the system environment. Based on this analysis, they work together with you to develop precisely the right solution to meet your needs.

G+D service: Any place, any time
Our close-knit, global service network offers customer support round the clock, and we make sure your systems are always current with updates and upgrades.

G+D remote service: impressive precision
Optimize the availability of your systems with G+D remote access. This enables our service specialists to swiftly identify problems and repair the majority of faults almost instantly.
Find your way to intelligent automated processing

NotaTracc increases efficiency and security within your cash center, while also revealing interesting perspectives for new cooperation models. Our experts would be delighted to show you our options for intelligent automated processing and work with you to come up with the ideal solution for your company.

Let’s talk!
