# BPS<sup>®</sup> C2-3

Outstanding performance –  
advanced flexibility

Banknotes can be processed efficiently and cost-effectively with the latest generation of tabletop systems from G+D. Three delivery compartments mean very flexible sorting options. Consistently high throughput of 1,050 banknotes per minute ensures superior productivity, and best-in-class sensors guarantee maximum reliability during authentication and fitness detection. All of this makes the BPS C2-3 the ideal solution for commercial banks, cash-in-transit companies, and casinos that want to combine peak performance with a high level of flexibility.

# Enhanced variability and efficiency, for future-fit processes

## Greater productivity

Breathtakingly fast: consistently high throughput of up to 1,050 BN/min enables significantly enhanced productivity in banknote processing. The high speed of the BPS C2-3 remains unrestricted whether authenticating, or sorting by value, orientation, or fitness. What's more, the user-oriented operator guidance keeps the number of work steps to a minimum.

## Greater security

Reliable and precise: the very best sensors are used in the BPS C2-3. Their absolute reliability in identifying counterfeits and sorting for fitness means these machines set new standards for compact tabletop systems. They can also read serial numbers if necessary.

## Greater ease of use

Simplified to what's most important: both the ergonomic system design and the clear user interface ensure easy and intuitive operation. The system can also be very easily adapted to specific requirements.

## Greater future viability

Open for future developments: numerous possible interfaces allow the BPS C2-3 to integrate perfectly into the respective system landscape. The potential for connected cash processing can be unlocked to the maximum extent using cutting-edge tools, applications, and web services. The result: even more efficient and cost-effective processes.

# 1,050

banknotes per minute

The BPS C2-3 works at a consistently high speed of 1,050 BN/min when counting, sorting, authenticating, and even reading serial numbers

## TECH FACTS

**Speed:**  
1,050 BN/min

**BN formats (length x width):**  
100–181 x 60–85 mm

**Currencies:**  
Multi-currency: up to 60 currencies  
Mixed currency: up to 10 currencies

**Singler capacity:**  
(depending on BN quality)  
up to 900 BN

**Output compartment capacity:**  
(depending on BN quality)  
up to 250 BN

**Reject compartment capacity:**  
(depending on BN quality)  
up to 100 BN

**Dimensions (H x W x D):**  
62 x 33 x 43 cm

**Weight:**  
~ 32 kg

**Temperature range:**  
15°C–35°C

**Electrical specifications:**  
10–240 VA, 50/60 Hz

**External connections:**  
1 x LAN, 4 x USB host,  
1 x USB device

**Certificates:**  
CE
