BPS® C2-3
Outstanding performance – advanced flexibility

Banknotes can be processed efficiently and cost-effectively with the latest generation of tabletop systems from G+D. Three delivery compartments mean very flexible sorting options. Consistently high throughput of 1,050 banknotes per minute ensures superior productivity, and best-in-class sensors guarantee maximum reliability during authentication and fitness detection. All of this makes the BPS C2-3 the ideal solution for commercial banks, cash-in-transit companies, and casinos that want to combine peak performance with a high level of flexibility.

Enhanced variability and efficiency, for future-fit processes

**Greater productivity**
Breathtakingly fast: consistently high throughput of up to 1,050 BN/min enables significantly enhanced productivity in banknote processing. The high speed of the BPS C2-3 remains unrestricted whether authenticating, or sorting by value, orientation, or fitness. What’s more, the user-oriented operator guidance keeps the number of work steps to a minimum.

**Greater security**
Reliable and precise: the very best sensors are used in the BPS C2-3. Their absolute reliability in identifying counterfeits and sorting for fitness means these machines set new standards for compact tabletop systems. They can also read serial numbers if necessary.

**Greater ease of use**
Simplified to what’s most important: both the ergonomic system design and the clear user interface ensure easy and intuitive operation. The system can also be very easily adapted to specific requirements.

**Greater future viability**
Open for future developments: numerous possible interfaces allow the BPS C2-3 to integrate perfectly into the respective system landscape. The potential for connected cash processing can be unlocked to the maximum extent using cutting-edge tools, applications, and web services. The result: even more efficient and cost-effective processes.

1,050 banknotes per minute

The BPS C2-3 works at a consistently high speed of 1,050 BN/min when counting, sorting, authenticating, and even reading serial numbers.

---

**TECH FACTS**

- **Speed:** 1,050 BN/min
- **BN formats (length × width):** 100–181 × 60–85 mm
- **Currencies:**
  - Multi-currency: up to 60 currencies
  - Mixed currency: up to 10 currencies
- **Singler capacity:** (depending on BN quality) up to 900 BN
- **Output compartment capacity:** (depending on BN quality) up to 250 BN
- **Reject compartment capacity:** (depending on BN quality) up to 100 BN
- **Dimensions (H × W × D):** 62 × 33 × 43 cm
- **Weight:** ~ 32 kg
- **Temperature range:** 15°C–35°C
- **Electrical specifications:** 10 – 240 VA, 50/60 Hz
- **External connections:** 1 × LAN, 4 × USB host, 1 × USB device
- **Certificates:** CE
