BPS® C5
On the Fast Track –
With Maximum Efficiency
The BPS C5 was developed to specifically meet the needs of small and medium-sized cash centers and count rooms, as well as back offices within large bank branches. In all these areas, ever-increasing competitive and price pressures necessitate streamlined processes, increased productivity, and reduced costs, as well as a high level of flexibility to adapt to future requirements.

Tailor-made for a new level of efficiency: The BPS C5 precisely fulfills banknote processing requirements, with outstanding efficiency, flexibility, and user-friendliness.
MEETING THE NEEDS OF TODAY AND TOMORROW
The solution from G+D Currency Technology is a modular, scalable system that fulfills all process requirements with the greatest reliability, efficiency, and user-friendliness. A high nominal throughput of up to 63,000 banknotes per hour, an exceptionally flexible modular concept, state-of-the-art, framework-compliant sensors, and a multitude of software options combine to offer significant competitive advantages.

EQUIPPED WITH THE BEST CONNECTIONS
And that’s not all: The BPS C5 is ideally prepared for leveraging all the advantages that connectivity can provide. Used in conjunction with cash management software (e.g. Compass VMS) or elements of the BPS Ecosystem (e.g. a remote service connection), it makes the entire operation more transparent, secure, and efficient.

The modular concept of the BPS C5 enables wide-ranging configuration options: Opt for up to 25 output stackers to enable diverse customer requirements to be met.
PRODUCTIVE AND EFFICIENT
Count, check for authenticity and fitness, and sort based on a wide variety of criteria: The BPS C5 processes banknotes reliably and precisely, with a nominal throughput of up to 63,000 banknotes per hour. It is suitable for all substrates (paper, hybrid, polymer) and also for casino tickets. With its high number of output stackers, it supports multiple and even complex sorting requirements. The system is extremely easy to use, sustainably facilitating the necessary throughput and efficiency.

MODULAR AND FLEXIBLE
The modular and scalable system can be equipped with up to 6 Standard Delivery Modules (SDM). Each SDM contains 4 output stackers for up to 250 banknotes. Up to 50 different operation modes can be defined per currency and they are easy to choose for the operator. The BPS C5 supports both the traditional two-step process and one-step processes (e.g. with header cards). Its design also means it can be used by either one or two operators.

RELIABLE AND SECURE
The sensor system in the BPS C5 verifies and sorts banknotes quickly, precisely, and reliably. The system excels in the detection of counterfeits (including composed banknotes) and in sorting by predefined fitness criteria or central bank frameworks. For additional security, video monitoring interfaces and the industrial firewall BPS Eco-Protect (see p. 7) can be provided on request.

FUTUREPROOF INVESTMENT
The system’s enhanced modularity makes it easy to upgrade with extra standard delivery modules. This will also be valid for future enhancements. The BPS C5 also features all the interfaces required for smooth networking with cash management software.
The most important features at a glance

1. Highly flexible configuration with up to six Standard Delivery Modules (SDM)
   - Each SDM contains four output stackers for up to 250 banknotes
   - Existing machines can be upgraded easily on site

2. Very simple, intuitive, and easy to use

3. Nominal throughput of up to 63,000 banknotes per hour in all operation modes

4. State-of-the-art sensors, developed specifically to meet the requirements of commercial users: fast, reliable, precise

5. Can be easily integrated with cash management software and supports comprehensive remote functionalities to increase productivity and transparency

6. Platform concept enables increased efficiency for training and operation, updates/upgrades, and service, as well as in relation to integration
Tailored for operational efficiency

With up to six delivery modules, up to 25 output stackers, and up to 50 processing modes for each installed currency, as well as numerous software options, the BPS C5 can be precisely customized to meet your specific process requirements.

Base module
with large feeder (up to 1,500 banknotes), reject stacker (up to 250 banknotes), and sorting stacker (up to 250 banknotes).

Standard Delivery Module (SDM)
with four output stackers; each accommodating up to 250 banknotes.

One platform – numerous advantages
The BPS C5 is based on a joint platform concept with the BPS C2 product family, so the functionalities, software, and controls are virtually identical. This means you benefit from greater efficiency and a considerable reduction in effort for updates, upgrades, and system integration – in terms of outlay for training, switching to a new system, maintenance, and service.
The basis of productivity is availability

With our needs-oriented consulting team and fully comprehensive service portfolio, Giesecke+Devrient customers benefit from full productivity and smooth operation of systems – for the entire life of the products.

G+D CONSULTING SERVICES: FOR SOLUTIONS THAT ARE THE PERFECT FIT
Our experts analyze the individual needs, existing processes, special requirements, system environment and more. Based on this analysis, we will recommend the right solution for your operation, and it will be integrated smoothly into your production processes.

G+D SERVICE: ALWAYS AT YOUR SIDE, WHATEVER AND WHEREVER YOU NEED IT
Our dense, global service network ensures that customers can rely on our support at all times. Your systems are kept up-to-date with frequent updates and upgrades – which can further boost productivity after installation.

G+D REMOTE SERVICE: THE FASTEST SOLUTIONS VIA REMOTE ACCESS
Use G+D remote services to optimize uptime of your systems. A large proportion of system failures can be immediately responded to and resolved using G+D remote access. Our service specialists identify the issue and put it right in an instant.

BPS ECO-SYSTEM: FUTUREPROOF USE OF DIGITAL POTENTIAL
BPS Eco-System is an innovative portfolio of highly secure networked software products and web services that boost the efficiency of cash management and banknote processing.

BPS Eco-Protect is an industry firewall which efficiently protects a BPS in a customer’s environment against most malware attacks, and enables secure communication to and from the BPS.

BPS Eco-Remote provides a highly secure remote management solution for BPS. It allows remote monitoring, performance management, diagnostics and even software updates to be provided through G+D, or using in-house or third-party personnel, without local presence of a service engineer.

Compass VMS (Vault Management System) is a comprehensive, process-oriented cash center management solution, enabling all of your cash management processes to be automated, optimized, and reliably monitored.

The BPS C5 can be readily integrated into existing IT structures. Cash management solutions such as Compass VMS ensure greater transparency, security and productivity throughout the process.
Securing Values: Giesecke+Devrient Currency Technology

G+D has played a significant role in advancing the development of banknotes since 1852 – and always with the aim of offering our customers a crucial advantage. We are now an end-to-end provider for the whole cash cycle, and have unique and thorough expertise in each application area: from counterfeit-proof banknote design and highly efficient banknote processing, to reliable banknote destruction. This extensive knowledge is incorporated into everything we do for our customers.

Let’s shape the future of the cash cycle together!

Ready to take the fast lane?

Our experts will be happy to personally show you how you can make your cash management even more efficient, reliable, and future-fit with the BPS C5. Are you ready to go faster?

TECH FACTS

Singling speed
1,050 BN/min

BN formats (Length x Width)
100–181 x 60–90 mm

Currencies
up to 10 currencies

Singler capacity
(depending on BN quality)
up to 1,500 BN

Output stacker in base module
(depending on BN quality)
1 x up to 250 BN

Reject stacker
(depending on BN quality and configuration)
1 x up to 250 BN

Standard Delivery Module (SDM)
(depending on BN quality)
4 x up to 250 BN per module

Dimensions (HxWxD):
(depending on configuration)
BPS C5-5
660 x 790 x 415 mm
BPS C5-25
660 x 2,140 x 415 mm

Weight
(depending on configuration)
67–252 kg

Temperature range
15–35° C

Electrical specifications
100–240 VA, 50/60 Hz

External connections
1 x LAN, 4 x USB host,
1 x USB device

Certificates
CE, GS, CB
