Secure Mobile Solutions for Seamless Travel

Enabling public transport for a connected future

These are challenging times for public transport. As the world's population keeps growing and concentrating in urban sprawls, public transport is becoming increasingly important. So it also needs to become more attractive at the same time. Mobile devices have become an integral part of modern life, and public transport is expected to adapt to changing consumer lifestyles. This puts

multimodal transport systems under enormous pressure as they must become more modern, efficient, and convenient to meet all future demands. How can public transport providers address these challenges and get ready for tomorrow?

G+D solutions for smart ticketing

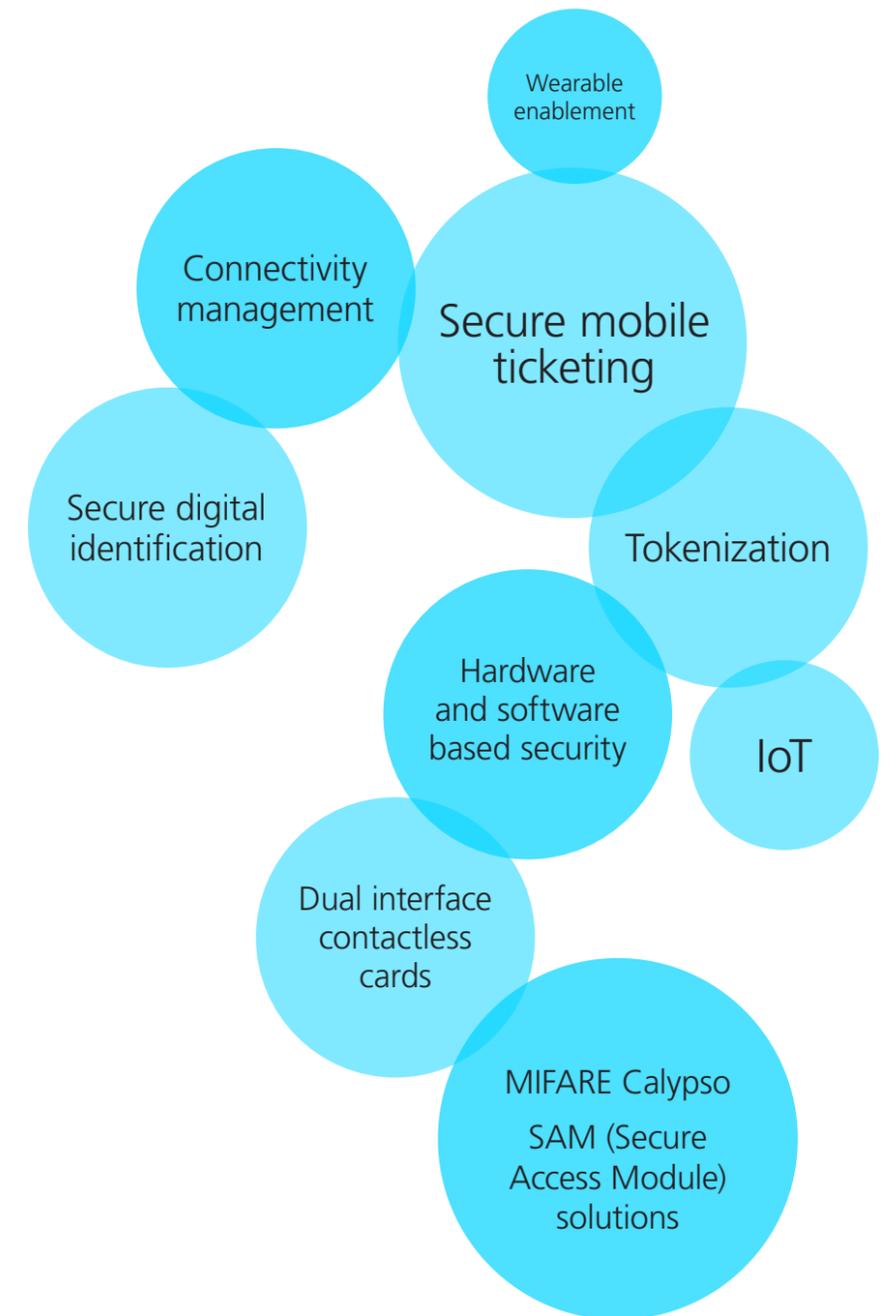

Providing every 5th contactless EMV card worldwide, we know that security and efficiency are key. Already, we are among the global top 3 vendors of contactless public transport tickets, trusted by over 50 million passengers every day. We were the first to introduce contactless MIFARE® smart cards, and we have continued to supply them for over 25 years now.

The best innovations to address future demands

G+D's portfolio of innovative and reliable products and services offers a wide selection of secure, flexible, and speedy solutions to simplify travelers' lives today and tomorrow. Especially taking into account how the lifestyle of millennials impacts mobility: they expect access to nearly all information and online content at any time, accurate booking, and one-stop shopping, all from their mobile devices, especially using mobile apps. Our custom-tailored, future-oriented products help you become more agile in addressing changing expectations in speed and convenience. This helps increase efficiency and throughput while optimizing costs and reducing cash handling.

We allow you to offer service bundling adapted to the mobile lifestyle of your customers, including event ticketing, car sharing, or parking.

We supply a variety of future-proof technologies that enable new services for end users and commuters. Our expertise in the field makes us your perfect partner for identifying key technologies that will help your business meet the challenges of the future – and to implement them in secure, reliable, and efficient solutions – tailored to your needs.

Managing identities in a connected world

G+D Mobile Security is a global mobile security technology company headquartered in Munich, Germany. The company is part of the Giesecke+Devrient group. G+D Mobile Security has a workforce of 5,300 employees and generated sales of approximately 877 million in 2019 fiscal year. More than 40 sales and partner offices as well as 20+ certified production and personalization sites and data centers ensure customer proximity worldwide.

G+D Mobile Security manages and secures billions of digital identities throughout their entire life cycle. Our products and solutions are used by commercial banks, mobile network operators, car and mobile device manufacturers, business enterprises, transit authorities, and health insurances as well as their customers every day to secure payment, communication, and device-to-device interaction. G+D Mobile Security is a technology leader in its markets and holds a strong competitive position.
