

MWC 2018: G+D Mobile Security presents its sophisticated solutions for securing identities for the digital economy

05-02-18

Munich

Giesecke+Devrient

Munich, February 5, 2018 – At this year`s Mobile World Congress (MWC) in Barcelona (February 26th to March 1st), G+D Mobile Security will be showcasing its products and solutions under the motto “Protect what matters to you” by securing identities for the digital economy. Secure digital identities are vital for all digital products and services that are paving the way towards digitization and ultimately to “Creating a better future”, which is this year`s motto of the MWC. G+D Mobile Security presents and demonstrates solutions to secure and manage all kinds of digital identities for its focus industries such as Connectivity Service Providers (CSP), device makers, automotive, financial institutions and enterprise security on its booth in Hall 7 (Booth 7A41).

Connectivity Service Providers:

With its world-leading eSIM management solutions, G+D Mobile Security provides instant connectivity and enables the secure digitization of all processes of a Connectivity Service Provider. Leading device makers and CSPs are already using its eSIM solutions to ensure initial device identification and instant eSIM provisioning. G+D offers a solution for the remote onboarding of new customers in compliance with customer identity verification regulations. G+D Mobile Security addresses both the needs of consumer and M2M applications while also driving the IoT implementation.

Device makers:

Mobile device makers like manufacturers of smartphones, wearables, portables, or any kind of connected commercial IoT devices benefit from G+D's security management solutions to enhance their global propositions and improve consumer experiences. The solutions shown at MWC include secure operation system updates and eSIM/applet management. G+D Mobile Security will showcase a complete wearable enablement platform for highly secure applications.

Automotive:

G+D Mobile Security's eSIM management solutions are widely used in cars for infotainment, eCall and other telematics applications. G+D Mobile Security offers a holistic Automotive Security Management Framework providing role-based service access control, SOTA (Software Update Over the Air) and digital car key solutions, while protecting the in-car communication from cyber attacks with security intelligence and intrusion detection cloud services. Highlights shown at MWC include a joint project demonstration with the German car maker BMW as well as a very fast and secure communication gateway, exclusively offered and developed by G+D with its partner M2MD.

Financial institutions:

Financial institutions on the path of digital transformation need secure processes for all parts of their customers' user journey. G+D Mobile Security supported leading banks (Rabobank, German Saving Banks Finance Group, Erste Austria, Dutch de Volksbank Group, etc.) in introducing convenient and secure mobile payment services. At MWC, G+D will demonstrate a seamless and secure, fully digitized customer journey for Financial Institutions that is consumer-centric, convenient and channel-agnostic.

Enterprises:

Enterprises have to ensure secure identities for their customers and provide a secure onboarding for new services. G+D Mobile Security offers a one-stop-shop solution with an entirely digital approach for the management of digital identities of their customers by securely issuing, provisioning, managing, revoking and authenticating digital identities of users, mobile devices, machines, and applications - including onboarding with Secure Remote Identification, authentication and usage that complies with FIDO standards, and revoking access to physical and cloud-based assets.

About G+D Mobile Security

G+D Mobile Security is a global mobile security technology company headquartered in Munich, Germany. The company is part of the Giesecke+Devrient group. G+D Mobile Security has a workforce of 5,800 employees and generated sales of approximately EUR 860 m in the 2016 fiscal year.
