Acquisition of secunet

2015
Veridos GmbH – JV with Bundesdruckerei
G+D secures physical and digital values in four major playing fields

Enabling secure **Payment** transactions in physical, electronic and digital form

Providing secure **Connectivity** solutions for mobile devices in the Internet of Things

Safeguarding **Identities** and authentication of persons and objects

Protecting **Digital Infrastructures** systems, networks and confidential data

Creating confidence through **physical security components** and hardening solutions with **digital security technology**
The composition of the portfolio strengthens G+D's market position

- G+D offers a wide range of products, solutions and services
- G+D is thus uniquely positioned for the convergence of the four major areas of payment, connectivity, identities and digital security
- Payments and digital infrastructure are highly resilient market segments
- Identities and digital infrastructure show great growth potential
- Connectivity offers good long-term perspectives and serves as access to the Internet of Things
Global market leader in Payment with unique offering

**Payment**
Global leader in physical and electronic as well as digital payments

**Market situation**
The Payment market remains a critical infrastructure and an important customer touchpoint for almost all industries. It offers good long-term perspectives and resilience for players with high expertise.

**Our key success factor**
As the global market leader G+D provides a unique offering along the whole physical, electronic and digital payment cycle.

**Annual growth (G+D)**
up to 5%
Positioned optimally to benefit from next-gen connectivity

**Connectivity**
Securing connectivity as a gateway to the internet of things

**Market situation**
The connectivity market is a key to the digital world. It serves as a gateway to the growing megatrend Internet of Things.

**Our key success factor**
With its industry leading connectivity solutions G+D is positioned optimally to benefit from next-gen connectivity.

**Annual growth (G+D)**
up to 10%
Trusted offering along the whole lifecycle of identification

Identities
Safeguarding personal identities and authentication

Market situation
Identity management is the foundation for efficient physical and digital security. This growing market supports many industries (e.g. payment applications, connectivity, government business, health) with trustworthy identification.

Our key success factor
G+D provides a trusted offering of products and solutions along the whole lifecycle of physical and digital identification.
Digital Infrastructures
Protecting data, communication channels & critical infrastructures

Annual growth (G+D) more than 10%

Market situation
Secure digital infrastructures are the main pillar for a functioning digital world. Imminent cyber risks are driving the global need for proper security measures.

Our key success factor
G+D is a trusted partner of governments and businesses and a technology leader for digital infrastructure.
Our company structure – G+D operates as a Group

G+D Currency Technology

VERIDOS

G+D advance52

G+D Mobile Security
